Schoolworx is a modern student administration system that assists teachers, support teams and educational leaders to provide the best outcomes for students and parents through easy access and management of an extensive range of student information, anytime, anywhere!

### Convenient Cloud-based Access

Schoolworx is a true cloud-based student management system for all schools (K-12) that can accommodate large numbers of schools in a secure environment. Designed as a school-focused web application, Schoolworx delivers crucial information about your students when you need it.

### Improved Efficiency

Schoolworx provides easy (secured) access, intuitive data entry, extensive reporting, and analysis, that allows educators to better track and report on a broad range of issues. Identify 'at risk' learners, high achievers, and provide detailed data analysis in key areas such as attendance, behaviour, welfare, and academic performance.

Support teams can access and update information across schools in a secure, centrally managed environment.

Compliance officers can move seamlessly between schools with only one click, and quickly generate performance reports for all schools.

### Real-Time Event Notifications

The well-being module has an extensive real-time notification system for alerting school leaders and managers to important information that has been added or updated to students' well-being profiles.

### Reliable & Secure

Schoolworx is based on mission-critical and scalable Microsoft technology. Schoolworx contains a role-based security regime that fits-in seamlessly with your schools existing authentication systems. All major browsers are supported as well as mobile devices including iPads and Android devices.

### Centralised Data

The Schoolworx database is the single source of information for all student information needs. Data includes personal and performance details including student profile, attendance data, timetable information, wellbeing records, mark book and reports.

### Parent/Teacher Communication

Schoolworx provides a central platform for communication between teachers, student, and parents. Schoolworx includes calendar, email, and SMS capability to inform and notify students and parents.

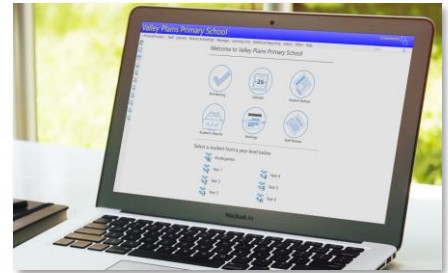

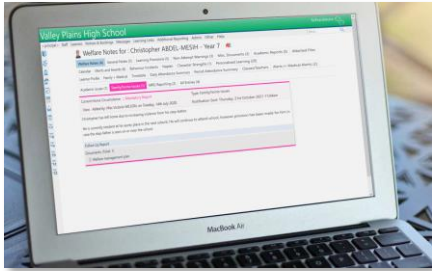

### Flexible Options

Schoolworx is a multi-tenanted student management solution meeting school system objectives as well as providing school level features and functionality. Each school has its own environment that can be tailored to the specific needs of the individual school.

## For Teachers, Executive and Administration

Schoolworx is a modern, easy to use student management system that has an extensive set of tools to collect and manage data on a wide range of student performance and wellbeing datasets for students from kindergarten to year 12. All this information is at your fingertips and additional notes and comments can be created and stored on student records and shared with other teachers and support teams. Access is controlled by role-based security and authentication is provided by using Single Sign On (SSO).

Communications with outside systems occurs in real-time and happens behind the scenes using a sophisticated services module. External information is linked through automated imports and exports.

## For Students and Parents

Students and parents have direct access to the relevant student data including school calendar, attendance, well-being data, and reports. Schoolworx streamlines communication through email and SMS communication and reminders.
